Summary

I am a passionate Flutter Developer and CSE student with a strong foundation in Dart, C, C++ & Flutter. I enjoy building user-friendly mobile applications and exploring modern software development practices.

I have experience working with Flutter, Firebase, REST APIs, local databases, and state management while developing real-world applications. I am continuously improving my problem-solving, debugging, and data structures & algorithms skills to become a better software engineer.

I love learning new technologies, writing clean and maintainable code, and turning ideas into functional digital solutions. My goal is to grow as a professional mobile app developer and contribute to impactful software projects.

Experience

CodeAlpha

Mobile App Development Intern

🔗 <https://www.codealpha.tech/#/>

July 2026 - August 2026

India

Completed a Mobile App Development Internship at CodeAlpha from 20 July 2026 to 20 August 2026.

During this internship, I gained hands-on experience in mobile application development, focusing on Flutter, Dart programming, UI development, application logic, and debugging. I worked on improving my understanding of the mobile app development lifecycle and applied software development concepts through practical tasks.

This internship helped me enhance my problem-solving skills, coding practices, and ability to build user-friendly mobile applications while gaining valuable industry exposure.

Projects

Trendify - E-Commerce App

Modern E-Commerce application built with Flutter & Dart, featuring clean UI, product browsing, product details, cart functionality, and smooth shopping experience.

🔗 <https://meek-chimera-356c93.netlify.app/>

BMI Calculator

Java based BMI calculator application with clean and user-friendly interface.

🔗 https://github.com/Amirhossainlimon/BMI_Checker_APP

Java-based BMI Calculator app that analyzes user health data, calculates BMI, displays health categories, and provides personalized recommendations for weight loss, gain, or maintenance to achieve a healthy range.

Task Manager App

Productivity app to manage daily tasks with simple and clean Flutter UI.

🔗 https://github.com/Amirhossainlimon/Task_Manager

A Flutter-based Task Manager application designed to improve productivity by helping users create, organize, and manage daily tasks efficiently. The app features a simple and clean UI, task tracking functionality, and an easy-to-use interface for better task management.

Weather App

Weather application using API integration to show real-time weather information.

🔗 https://github.com/Amirhossainlimon/Simple_weather_app

Quote Vault

Motivational quote application built with Flutter and local storage.

🔗 https://github.com/Amirhossainlimon/CodeAlpha_Quote_Vault_APP

Flashcard Quiz App

Interactive quiz application developed during CodeAlpha internship.

Internship Offer Letter

CodeAlpha

July 2026

 <https://www.codealpha.tech/#/>

Received an Internship Offer Letter from CodeAlpha for the App Development Internship program. This opportunity provided hands-on learning exposure in mobile application development, improving technical skills, problem-solving abilities, and understanding of the software development workflow through practical experience.

App Development Internship

 <https://codealpha.tech>

Completed a 1-month Virtual Internship Program as an App Development Intern at CodeAlpha from July 20, 2026 to August 20, 2026. Gained practical experience in Flutter application development, UI implementation, debugging, and mobile app development workflows. CodeAlpha recognized my analytical skills, adaptability, teamwork, and contribution during the internship period.
